

CHILD PASSENGER SAFETY TECHNICIAN TRAINING

If you are interested in helping children stay safe while traveling, consider becoming a nationally certified Child Passenger Safety technician. This four-day training course will help you learn more about:

- Injury prevention and crash dynamics
- Car seat effectiveness
- Appropriate car seat selection and installation
- How to conduct a car seat check event

After completing the training, you will be able to provide educational services for parents/caregivers and serve as a community resource. This course is ideal for hospital pediatric and nursing staff, law enforcement, fire departments, first responders, child care providers, parents and injury prevention advocates.
