

Evidence-Based Practices for Autism Spectrum Disorders

Date & Time:

Tuesday, September 17, 2019

6:00 – 7:00 pm Overview

7:00 – 7:30 pm Discussion Session

Location:

LADSE Central Office

Board Room, Main Floor

1301 W. Cossitt Avenue

LaGrange, IL 60525

Presenter:

Dr. Celine Saulnier

*Owner, Neurodevelopmental
Assessment & Consulting Services*

Autism Spectrum Disorder (ASD) is one of the more heritable of childhood disabilities, but even as genetic discoveries are made, the treatment for ASD is predominantly behavioral. There are numerous evidence-based practices for treating ASD throughout the lifespan, as well as complimentary and alternative methods of intervention that either lack scientific evidence or have been unfounded. This presentation will provide a broad overview of what practices are evidence based, as well as those that aren't, followed by a 30-minute discussion session.
